Hi Ehud

I got this offer today.

Do you find it interesting?

Amir,

Another totally different issue from my 2nd Company **Global Geo Services As (GGS).**
Would you be able to try a fast sell of the Persian Carpet 2000 (112,000 Km of modern 2D seismic+ 3D seismic data) to Israel for me? (Israel Oil Ministry , Israel Defence Ministry or Isramco or any other Israel Authority?).
We license the entire data base with ALL seismic, all Interpretation reports, all Gravity data, 120 wells data.
We also provide ALL data ready in the Kingdom Suite Work Station format with all interpreted horizons and all wells.

So far **19** International E&P Companies (US, EU, AP region)have licensed the data. The latest 1 month ago. I attach the Flyer.
We can do a good deal now before the Iran Ministry announces their new Oil Contracts in London. Then our database will be much more expensive for the coming bid rounds.

It is 2 aspects of a deal with Israel (you know what I mean!):

1) **Strategic E &P aspect** for participating in Iran Persian Gulf and Oman Gulf Exploration.
2) **Strategic Political aspects** of understanding **what Resources the Israel "neighbor" actually have.**

Let me know if you could manage at highest level?
If not; I will work via the Israel Embassy here.

BR
Bjorn

GGS Global Geo Services
Yours Sincerely

See attached and bellow..

Subject: Alacol Basin Kazakhstan

Schalom Amir,

along I send you as discussed the Alacol Basin docs from Kazakhstan.

The sales price of this exploration is 135M USD. Another 135-150M would be needed as an invest for the exploration of the infrastructure. There is a 10-12B revenue for the investor in this project.
